1 **I. INTRODUCTION**

2 On September 18, 2017, this Court granted preliminary approval of a proposed  
3 nationwide class action settlement between Plaintiff William Scott Callaway (“Plaintiff”)  
4 and Defendant Mercedes Benz USA, LLC (“Defendant” or “MBUSA”) (the  
5 “Settlement”). Class Counsel achieved the Settlement after three years of hard-fought  
6 litigation in which Class Counsel left no-stone unturned and spared no expense. With no  
7 guarantee of ever getting paid for their time, Class Counsel spent 4,023 hours  
8 aggressively litigating this case on behalf of the Class. With no guarantee of ever getting  
9 reimbursed, Class Counsel also incurred nearly \$650,000 in out-of-pocket costs  
10 prosecuting the case. Class Counsel’s efforts resulted in a settlement that provides  
11 tremendous benefits to the Class. The three primary benefits of the Settlement are as  
12 follows:

13 *First*, Class Members can receive a free bypass wire repair procedure at any  
14 authorized, independently owned Mercedes-Benz dealership. This procedure is intended  
15 to eliminate the risk of a future seat heater malfunction like the ones alleged in this  
16 lawsuit. This procedure was developed as part of this Settlement. It will be covered by  
17 Mercedes-Benz standard 2-year parts warranty. Based upon the number of Subject  
18 Vehicles (approximately 270,000), Plaintiff’s economic expert, Greg Pinsonneault,  
19 estimates that the total retail value of this repair to the Class is approximately  
20 \$75,600,000 (270,000 vehicles x \$280 per repair). [Declaration of Greg Pinsonneault  
21 (“Pinsonneault Decl.”), ¶¶ 10-12.]

22 *Second*, Class Members who do not elect the bypass repair procedure will  
23 automatically receive extended warranty coverage in the event the seat heater in their  
24 vehicle experiences the seat heater malfunction alleged in this lawsuit. Specifically, if a  
25 Class Member does not elect the bypass repair procedure, MBUSA will contribute to the  
26 cost of any necessary future repairs, subject to certain time and mileage limitations. Class  
27  
28

1 Members do not have to submit a claim form or do anything else to receive this benefit.<sup>1</sup>

2 *Third*, Class Members who previously experienced the alleged seat heater issue  
3 and paid to have it repaired can receive a reimbursement for the reasonable costs incurred,  
4 up to \$1,000 per repair. Class Members can obtain the benefits of this option, in addition  
5 to one of the two options offered above. Based on expert analysis of the data provided  
6 by MBUSA, Plaintiff's expert estimates that approximately 20,107 of the Subject  
7 Vehicles will experience or have experienced a seat heater malfunction after 50,000 miles  
8 (MBUSA's warranty expires after 50,000 miles). This estimate does not include vehicles  
9 that were reportedly repaired by MBUSA during the warranty period, or after the  
10 warranty period (as part of a goodwill repair). Given the age of the Subject Vehicles  
11 (which are now 10 to 17 years old), Pinsonneault conservatively estimates that at least  
12 half of the 20,107 Subject Vehicles have already experienced the malfunction, for a total  
13 of 10,054 vehicles. Thus, the total value of the repair reimbursement option is at least  
14 \$10,054,000 (10,054 x \$1,000). [Pinsonneault Decl., ¶¶ 5-9.]

15 By this motion, Class counsel seeks an award of attorneys' fees in the amount of  
16 \$5,662,387.50. That amount is just 6.6% of the Settlement's overall value of the  
17 Settlement. Plaintiff also seeks reimbursement of \$584,085.21 in costs (which is more  
18 than a 15% discount relative to Class Counsel's actual out-of-pocket costs of almost  
19 \$650,000). Plaintiff, Mr. Callaway, further seeks an incentive award of \$10,000 for his  
20 time, effort and dedication to this matter as the class representative. Pursuant to the terms  
21 of the Settlement, these awards will be separately paid by MBUSA, and will not in any  
22 way reduce the amount of monetary benefits available to the Class. Accordingly, for the  
23 reasons provided herein, Plaintiff and Class Counsel request that this motion be granted.

## 24 **II. CASE BACKGROUND AND HISTORY**

25 This lawsuit concerns Plaintiff's allegation that the seat heaters in certain Mercedes  
26 Benz vehicles contain a design defect that can cause the seat heater to overheat, spark,

---

27 <sup>1</sup> Class Members electing the bypass wire repair will not receive this extended warranty  
28 coverage, because their vehicle will be covered by MBUSA's two-year parts warranty.

1 smoke and burn a hole through the seat while the driver is operating the vehicle. [See  
2 Dkt. Nos. 1, 165; Declaration of Jason M. Frank (“Frank Decl.”), ¶ 8.] Plaintiff alleges  
3 that MBUSA knew about this defect for nearly two decades, and yet failed to disclose it  
4 to customers. [Id.]

5 Because the alleged problem will more likely occur after the warranty period  
6 expires, Class Counsel elected to pursue a fraudulent non-disclosure theory as opposed  
7 to a breach of warranty theory to maximize the chance of obtaining remedies on behalf  
8 of all affected customers. [Frank Decl., ¶ 9.] To do this, Plaintiff needed to prove, inter  
9 alia: (a) MBUSA knew about the seat heater defect; (b) the seat heater defect presented a  
10 “safety risk” MBUSA was required to affirmatively disclose at the time of sale; (c)  
11 consumers would consider the seat heater defect to be “material” when deciding whether  
12 to purchase a Mercedes vehicle; and (d) the disclosure of the seat heater defect would  
13 have materially impacted the price of the vehicle. [Id.] Establishing these points involved  
14 highly technical engineering issues and complex conjoint analysis and economic studies  
15 designed to isolate the effect a defective seat heater would have on the overall market  
16 price of an automobile. [Id.]

17 Elizabeth Callaway, Plaintiff’s wife, personally experienced this defect when  
18 driving the couple’s 2007 Mercedes Benz R350.<sup>2</sup> Ms. Callaway’s seat heater started to  
19 smoke while she was driving, ultimately burning a hole through her seat and dress. [See  
20 Dkt. No. 168.] When Plaintiff and Ms. Callaway retained Class Counsel after the incident  
21 happened in mid-2014, Class Counsel retained a consulting expert (Safety Research &  
22 Strategies Inc.) to research how often this problem was occurring in Mercedes vehicles.  
23 [Frank Decl., ¶ 10.] Through this work, Class Counsel developed a large database of  
24 public reports across the country concerning this problem in numerous Mercedes vehicles  
25 – prior to filing the complaint. [Id.]

26 \_\_\_\_\_  
27 <sup>2</sup> Ms. Callaway was also a named Plaintiff in this case. However, her claims were  
28 dismissed on summary judgment the grounds that her husband, Mr. Callaway, was the  
person who signed the contract to purchase the vehicle. See Dkt. No. 152.

1 After filing the lawsuit on December 18, 2014, Class Counsel met with MBUSA’s  
2 counsel to attempt to isolate which models were primarily experiencing this problem, but  
3 MBUSA refused to offer any guidance. [Frank Decl., ¶ 11.] Even more challenging,  
4 MBUSA claimed the engineering data regarding this problem was in the possession of its  
5 German parent and outside the reach of US discovery pursuant to Supreme Court  
6 jurisprudence. [Id.]

7 Undaunted, Class Counsel began purchasing exemplar seats from numerous  
8 Mercedes models throughout the country and retained a highly-respected engineering  
9 expert (Dr. Gerald Zamiski, the President of Vollmer-Gray Engineering Laboratories,  
10 Inc.) to inspect the seats to determine the root cause of the problem and the models  
11 affected. [Frank Decl., ¶ 12.] Class Counsel also retained a former senior enforcement  
12 attorney from the National Highway Transportation Safety Administration (“NHTSA”) -  
13 - Allen Kam of Highway Traffic Safety Associates, LLC -- to study whether this problem  
14 posed a safety risk, and advise counsel on how to develop evidence demonstrating the  
15 safety concerns. [Id.]

16 Class Counsel further conducted extensive discovery – which MBUSA resisted at  
17 nearly every turn – compiling and reviewing in excess of 120,000 pages of documents,  
18 including defendants’ warranty reports, customer complaints, early warning reporting  
19 submissions to NHTSA, and emails about the problem going back to 1999. [Frank Decl.,  
20 ¶ 13.] Class counsel was forced to subpoena MBUSA’s former regulatory counsel to  
21 obtain the complete file of NHTSA reports and correspondence concerning the problem,  
22 and then forced to oppose a motion for a protective order filed by the former regulatory  
23 counsel in Maryland in order to obtain the data. [Id.] Class Counsel also travelled across  
24 the country on numerous occasions to take depositions establishing MBUSA’s  
25 knowledge about the problem, in addition to numerous depositions in Northern  
26 California. [Id.] Class Counsel also spent considerable time before the Magistrate (the  
27 Hon. Douglas F. McCormick) – winning key discovery battles. [Id.] Class Counsel’s  
28

1 time before the Magistrate included multiple formal motions to compel, numerous  
2 informal letter briefs and numerous informal discovery conferences. [Id.]

3 Through the engineering expert work and analysis of the warranty and complaint  
4 reports, Plaintiff and Class Counsel were able to determine the defect primarily existed  
5 in Mercedes SUVs, specifically the 2000-2007 M-Class, 2006-2007 R-Class and 2007  
6 GL-Class vehicles. [Frank Decl., ¶ 14; Dkt. Nos. 168-3, 168-4 and 192-10.] A  
7 comparison of the high incident rates in Mercedes SUV's (at times occurring in over one  
8 in ten vehicles) against non-SUVs (which experienced minimal incidents) vividly  
9 demonstrated the material problem in the SUVs and contradicted MBUSA's claim this  
10 was a de minimis "wear and tear" issue caused by "individual issues." [Id.; Dkt. No. 168-  
11 3 at Exh. 3.] By the time of expert discovery, even MBUSA's own engineering expert  
12 was forced to admit the "root cause" of the problem was the copper-wire design of the  
13 seat heaters in the Subject Vehicles. [Frank Decl., ¶ 14.]

14 But proving a common defect alone would not be sufficient to obtain class  
15 certification; Plaintiff would also need to present evidence the seat heater problem would  
16 be considered "material" to consumers and have a negative effect on the price paid for  
17 the vehicles. [Frank Decl., ¶ 15.] Because consumers do not purchase seat heaters as a  
18 stand-alone product, this would entail a complicated damage analysis attempting to  
19 isolate the economic impact on the market price caused by a defect in a subcomponent of  
20 a vehicle. [Id.]

21 Accordingly, Class Counsel retained one of the leading experts in the field of  
22 conjoint analysis (Dr. R. Sukumar, the CEO of Optimal Strategix Group, Inc.) – who  
23 regularly assists Fortune 500 companies set prices on their products based on changes to  
24 small product features. [Frank Decl., ¶ 16.] This study involved extensive consumer  
25 surveys and analysis. [Id.; Dkt. No. 168-2.] Class Counsel also retained other survey  
26 experts to replicate different survey methodology that counsel anticipated MBUSA would  
27 use to counter Dr. Sukumar's analysis, so Plaintiff would be prepared to address  
28 MBUSA's challenges. [Frank Decl., ¶ 16.] Conjoint analysis is a highly complicated

1 scientific technique that has been the subject of rigorous examination by federal courts in  
2 recent years. [Id.] When done right, it has been approved by federal courts as an  
3 appropriate method to calculate damages on a class wide basis, where other damage  
4 models have failed. [Id.] It is also very expensive, costing Class Counsel approximately  
5 \$200,000 in this case. [Id.] Class counsel also retained economic and damage experts  
6 (Litnomics – Bruce McFarlane and Greg Pinsonneault) and a consultant (Colin Weir) to  
7 analyze Mercedes’ economic and pricing data to buttress the results of the conjoint  
8 analysis, and avoid the missteps that had resulted in so many prior lawsuits losing on  
9 class certification. [Id.; Dkt. Nos. 168-3.]

10 Even before getting to the Class certification stage, Class Counsel had to  
11 successfully oppose numerous legal challenges brought by Defendants on highly complex  
12 issues. [Frank Decl., ¶ 17.] Class Counsel defeated MBUSA’s motion to dismiss and  
13 motion to strike at the pleading stage. [Id.; Dkt. No. 42.] Class Counsel then defeated  
14 MBUSA’s motion for summary judgment, including convincing this Court to reverse its  
15 tentative opinion granting summary adjudication against Plaintiff’s common law fraud  
16 claim. [Frank Decl., ¶ 17; Dkt. No. 152.] This required extensive briefing and legal  
17 analysis, including Court-ordered supplemental briefing on novel legal questions such as  
18 whether privity is required for a duty to disclose in the resale context under the common  
19 law, the UCL and the CLRA. [Frank Decl., ¶ 17; Dkt. Nos. 136, 151.] Through Class  
20 Counsel’s work and extensive experience in fraud class actions, Plaintiff was able to  
21 survive MBUSA’s legal challenges. [Frank Decl., ¶ 17.]

22 The attorney-hours and finances committed to this lawsuit were substantial, with  
23 Class Counsel incurring over \$3.43 Million in time and nearly \$650,000 in out-of-pocket  
24 expenses. [Frank Decl., ¶ 18.] This effort culminated in full class certification briefing  
25 and oppositions to three separate Daubert motions that were ready to be heard by the  
26 Court. [Id.; Dkt. Nos. 168 through 169 and 192 through 192-12] MBUSA ultimately  
27 agreed to settle this lawsuit prior to class certification. [Frank Decl., ¶ 18.]

1 **III. SUMMARY OF THE SETTLEMENT AND ESTIMATED VALUE**

2 **A. The Settlement Class**

3 The Settlement Class includes all current and former owners and lessees of  
4 Mercedes-Benz model year 2000-2007 M-Class, model year 2006-2007 R-Class, and  
5 model year 2007 GL-Class vehicles with original-equipment seat heaters who purchased  
6 or leased their Subject Vehicles in the United States (the “Subject Vehicles”).  
7 [Settlement (Dkt. No. 216-2), § 1.25.] Excluded from the Class are former owners and  
8 lessees whose Subject Vehicle did not experience a seat heater malfunction during the  
9 time they owned or leased their Subject Vehicle, as well as a few others. [Id.]

10 **B. The Settlement’s Primary Terms**

11 **1. Free Repair for Current Owners.**

12 Class Members who submit a valid claim form electing this option will receive a  
13 bypass wire repair procedure free of charge at an MBUSA authorized, independently  
14 owned and operated dealership of their choice. [Settlement, § 4.1.] The bypass wire  
15 repair procedure is intended to eliminate the risk of a future seat heater malfunction like  
16 the ones alleged in this lawsuit. [Id., § 1.5.] The repair involves installing a bypass wire  
17 in the seat cover. [Id.] The bypass wire repair procedure will be covered by MBUSA’s  
18 standard 2-year parts warranty. [Settlement, § 4.2.]

19 The total value of this free repair for the Class is approximately \$75,600,000.  
20 [Pinsonneault Decl., ¶ 12.] Specifically, under the Settlement, MBUSA has agreed to  
21 reimburse its authorized dealers for each bypass wire repair they perform for a Class  
22 Member. [Settlement, § 4.1; Frank Decl., ¶ 24(a).] MBUSA has represented this will  
23 internally cost MBUSA approximately \$200 per repair based on the costs for parts and  
24 labor. [Frank Decl., ¶ 24(a).] According to the data produced in discovery by MBUSA,  
25 Plaintiff’s expert estimates that the typical retail markup for this type of work (i.e., the  
26 amount customers would be charged for this repair) would be over 40%.<sup>3</sup> [Pinsonneault

27 <sup>3</sup> In particular, MBUSA produced exemplar pricing information related to the dealer,  
28 wholesaler and suggested list prices (parts and labor) for replacing the seat cushion that

Continued on the next page

1 Decl., ¶ 11.] Thus, Plaintiff's expert estimates the retail value of the repair to be \$280.  
2 [Id.] Given that there are approximately 270,000 vehicles covered by this Settlement, the  
3 total value of the free repair is approximately \$75,600,000 (270,000 x \$280). [Id.]

## 4 **2. Extended Warranty on Seat Heaters.**

5 Class Members who do not select the bypass wire repair procedure will  
6 automatically receive warranty coverage on a future seat heater repair performed at an  
7 authorized, independently owned and operated Mercedes Benz dealership to the extent  
8 the repair is made to address an issue alleged in this lawsuit, subject to the following  
9 limitations:

- 10 • **Vehicles with Less Than 40,000 Miles:** MBUSA will cover 75% of the repair  
11 cost.
- 12 • **Vehicles with Between 40,000 and 80,000 Miles:** MBUSA will cover 50% of the  
13 repair cost.
- 14 • **Vehicles with Between 80,000 and 140,000 Miles:** MBUSA will cover 25% of  
15 the repair cost.
- 16 • **Vehicles with Between 140,000 and 180,000 Miles:** MBUSA will cover 15% of  
17 the repair cost.
- 18 • **Vehicles with More Than 180,000 Miles or Which Need Repair More Than 2-**  
19 **years After the Effective Date of this Settlement:** MBUSA will have no  
20 obligation to cover the costs of a repair.

21 [Settlement, §§ 4.3 – 4.3.2.] Because this is an alternative option to the free bypass wire  
22 repair procedure, Plaintiff's expert has not attempted to independently determine the  
23 value of this benefit. [Pinsonneault Decl., ¶ 13.] Instead, to avoid double counting,  
24 Plaintiff's expert is assuming its value is covered by estimated value for the bypass wire  
25 repair procedure (\$75,600,000). [Id.] However, as explained further below, it is  
26 considerably more expensive to repair the seat after a malfunction occurs (around \$1,000)

27 \_\_\_\_\_  
28 contains the seat heater element. Plaintiff's 40% estimate of the retail mark-up is based  
on that data. [Pinsonneault Decl., ¶ 11.]

1 as compared to the cost of the bypass wire repair procedure (approximately \$280), so  
2 extended warranty coverage provides a significant economic benefit to the Class.

3 **3. Reimbursement for Past Repairs.**

4 Current and former owners or lessees who previously paid for seat heater repairs  
5 caused by the alleged defect at issue in this lawsuit will receive reimbursement for any  
6 costs they paid for the repairs up to a maximum amount of \$1,000 per repair. [Settlement,  
7 § 4.5.] Based on MBUSA’s records and representations, the outer limit for the cost of  
8 this repair in the past (at an MBUSA authorized dealer) has been approximately \$1,000.  
9 [Frank Decl., ¶ 24(c).] The reason why it costs more to repair a seat after a seat heater  
10 malfunction occurs (up to \$1,000) as compared to the cost of the bypass wire repair  
11 procedure (approximately \$280) is that Mercedes typically replaces the entire seat cover  
12 after the malfunction occurs because the seat cover (which includes the seat heater  
13 element) will have burned a hole through the seat. [Id.]

14 Plaintiff’s expert has determined that the value of this reimbursement option is  
15 conservatively over \$10,054,000. [Pinsonneault Decl., ¶¶ 6-9.] This was determined by  
16 projecting the total number of vehicles that will experience a malfunction based on the  
17 rate of malfunctions that were reported to Mercedes during the 50,000-mile warranty  
18 period – approximately 20,107 vehicles. [Id.] Plaintiff’s expert then assumed that  
19 approximately half of these vehicles (10,054 vehicles) will have already experienced the  
20 malfunction, which is a conservative assumption given the age of the vehicles. [Id.] He  
21 then multiplied the estimated number of vehicles that have experienced a malfunction  
22 (10,054) by the repair cost (\$1,000) to determine that this Settlement likely provides over  
23 \$10,054,000 in repair reimbursements available to the Class. [Id.]

24 **4. Attorneys’ Fees, Incentive Awards and Administration Costs.**

25 The Settlement provides that Defendants will separately pay for any attorney fees  
26 and costs awarded by the Court to Class Counsel, so long as the amount of attorneys’  
27 fees does not exceed \$5,662,387.50 and the amount of costs does not exceed  
28 \$584,085.21. [Settlement, § 5.3.] Defendant also will separately pay for any incentive

1 award approved by the Court for Plaintiff, so long as the amount does not exceed \$10,000.  
2 [Id. at § 5.2.] Defendant further will be solely responsible for the notice and claims  
3 administration costs. [Id. at § 8.1.] Defendant’s payments of these amounts will not in  
4 any way reduce the total benefits available to the Class.

5 **5. Release.**

6 In exchange for the above-described Settlement benefits, all Class Members who  
7 do not timely “opt-out” or request exclusion from the Class will release all claims against  
8 Defendant and its related entities which are “on account of or related to claims that the  
9 seat heaters in the Subject Vehicles are inadequate or of poor or insufficient quality or  
10 defective, due to wear or otherwise, which were alleged or could have been alleged as to  
11 the Subject Vehicles in the Litigation or in similar actions.” [Settlement, § 6.1.]  
12 However, this release expressly *excludes* and does not affect “claims for personal injuries  
13 or wrongful death.” [Id.]

14 **IV. THIS MOTION SHOULD BE GRANTED**

15 **A. Class Counsel’s Fee Request Is Fair, Reasonable and Appropriate.**

16 In deciding whether a requested fee amount is appropriate, the Court’s role is to  
17 determine whether such amount is “fundamentally ‘fair, adequate, and reasonable.’”  
18 Staton v. Boeing Co., 327 F.3d 938, 963 (9th Cir. 2003) (quoting Fed. R. Civ. P. 23(e)).  
19 In the Ninth Circuit, there are two methods of determining attorneys’ fees: the percentage  
20 of the benefit method and the lodestar method. Under the percentage of the benefit  
21 method, Courts will award attorneys’ fees equal to a percentage of the total monetary  
22 benefits available to the Class. In comparison, under the lodestar method, the Court will  
23 multiply the number of attorney hours incurred by a reasonable hourly rate in the  
24 community for similar work. McElwaine v. U.S. West, Inc., 176 F.3d 1167, 1173 (9th  
25 Cir. 1999). The Court may then raise or lower the lodestar based on several factors. See  
26 Kerr v. Screen Extras Guild, Inc., 526 F.2d 67, 70 (9th Cir. 1975); Fischel v. Equitable  
27 Life Assurance Soc’y, 307 F.3d 997, 1007 n. 7. Class Counsel’s fee request here is fair,  
28 adequate and reasonable under either approach.

1                   **1. Class Counsel’s Fee Request Is Fair and Reasonable Under the**  
2                   **Percentage of the Benefit Method.**

3                   The preferred method for determining attorneys’ fees in the Ninth Circuit is the  
4                   “percentage of the benefit” approach, whereby the Court will award attorneys’ fees equal  
5                   to a percentage of the total monetary benefits available to the Class. Vizcaino v.  
6                   Microsoft Corp., 290 F.3d 1043, 1047 (9th Cir. 2002); In re: Toyota Motor Corp  
7                   Unintended Acceleration Litigation, C.D. Cal. Case No. 8:10-ml-02151-JVS-FMO,  
8                   Order re: Fees (Dkt. No. 3802) at p. 4, n. 6 (Judge Selna). The percentage of the benefit  
9                   method is favored over a lodestar approach because it “more closely aligns the interests  
10                  of the counsel and the class, i.e., class counsel directly benefit from increasing the size of  
11                  the class fund and working in the most efficient manner.” Vizcaino, 290 F.3d at 1047.

12                  The benchmark award of attorneys’ fees in “common fund” or “constructive  
13                  common fund” cases is 25%. In re Bluetooth Headset Prods. Liabl. Litig., 654 F.3d 935,  
14                  942 (9th Cir. 2011) (citing Six Mexican Workers v. Ariz. Citrus Growers, 904 F.2d 1301,  
15                  1311 (9th Cir. 1990).) When a settlement provides monetary benefits on a claims-made  
16                  basis but does not create a common fund fixing the amount of benefits available to the  
17                  Class, “the Ninth Circuit may analyze the case as a ‘constructive common fund’ for fee-  
18                  setting purposes.” Nwabueze v. AT & T Inc., 2013 WL 6199596, at \*11 (N.D. Cal. Nov.  
19                  27, 2013) (quoting In re Bluetooth Headset Prods. Liabl. Litig., 654 F.3d 935, 941-943  
20                  (9th Cir. 2011)).

21                  “To calculate appropriate attorneys’ fees under the constructive common fund  
22                  method, the Court should look to the maximum settlement amount that could be claimed.”  
23                  Nwabueze, 2013 WL 6199596, at \*11. Courts have long looked to the entire value of the  
24                  benefits made available to class members, even in cases where it is unlikely all or most  
25                  of the benefits will be claimed. Lopez v. Youngblood, 2011 WL 10483569, at \*12 (E.D.  
26                  Cal. Sept. 1, 2011) (“It is well established that, in claims made or class reversion cases  
27                  where there is a maximum fund, and unclaimed funds revert to the defendant, it is  
28                  appropriate to award class fund attorneys’ fees based on the gross settlement value”);  
accord Boeing v. Van Gemert, 444 U.S. 427, 479-81 (1980) (concluding that class

1 counsel may recover a fee based on entire common fund created for class, even if some  
2 class members make no claims against the fund); Williams v. MGM-Pathe Commc'ns  
3 Co., 129 F.3d 1026, 1027 (9th Cir 1997) (reversing award of attorneys' fees because trial  
4 court failed to base fee award on the entire settlement, rather than the amount claimed).

5 In the present case, the total value of the Settlement benefits made available to the  
6 Class is over \$85,654,000. [Pinsonneault Decl., ¶ 12.] This includes the free bypass wire  
7 repair procedure for 270,000 vehicles (with a total retail value of approximately  
8 \$75,600,000) and reimbursement for past repairs (with a total estimated value of  
9 approximately \$10,054,000). [Id.] Accordingly, Class Counsel's fee request represents  
10 approximately 6.6% of total gross value of the Settlement. This is well below the 25%  
11 benchmark used in the Ninth Circuit. Vizcaino, 654 F.3d at 1048. On this basis alone,  
12 Class Counsel's fee request is more than fair and reasonable.

13 Class Counsel's fee request is further justified by the factors commonly used to  
14 assess appropriate attorneys' fees. "Although not mandated by the Ninth Circuit, courts  
15 often consider the following factors when determining the benchmark percentage to be  
16 applied: (1) the result obtained for the class; (2) the effort expended by counsel; (3)  
17 counsel's experience; (4) counsel's skill; (5) the complexity of the issues; (6) the risks of  
18 nonpayment assumed by counsel; (7) the reaction of the class; and (8) comparison with  
19 counsel's lodestar." Aichele v. City of Los Angeles, 2015 WL 5286028, at \*5 (C.D. Cal.  
20 Sept. 9, 2015); see also Vizcaino, 290 F.3d at 1048-50 (employing similar factors in its  
21 analysis). Each of these factors supports Class Counsel's fee request.

22 • **The Result Obtained for the Class.** The Settlement achieves a  
23 tremendous result for the Class. For example:

24 ○ *The Settlement Essentially Provides a Recall:* Because the  
25 fundamental premise of this lawsuit is the seat heater problem presents a safety risk, Class  
26 Counsel insisted that MBUSA figure out how to fix the problem and provide the repairs  
27 for free to the Class. [Frank Decl., ¶ 30(a).] And after nearly two decades, and two  
28 NHTSA investigations, MBUSA finally figured out how to fix the problem before it

1 occurs. [*Id.*; Dkt. No. 109-4 at Exhs. C, D; Dkt. No. 167-1 at Exh. E, F.] Class Counsel  
2 and Plaintiff achieved this primary objective for the Class because they were willing to  
3 “walk-away” from any settlement that did not include this remedy. [Frank Decl., ¶ 30(a).]

4 ○ *The Settlement Provides Full Reimbursement for Past Repairs.* The  
5 Settlement provides full reimbursement past repairs, limited only by the maximum  
6 reasonable cost of the repair (\$1,000) based on MBUSA’s records. [Frank Decl., ¶ 30(b);  
7 Pinsonneault, ¶ 7.] As with the free repair, Counsel and Plaintiff achieved this result  
8 because they were willing to “walk away” and hold out for the best deal for the Class.  
9 [Frank Decl., ¶ 30(b).]

10 ○ *The Settlement Goes Above And Beyond The “Usual” Automotive*  
11 *Class Action Settlement.* The free bypass repair procedure standing alone provides an  
12 extraordinary result to the Class. [Frank Decl., ¶ 30(c).] This repair benefit is in *addition*  
13 *to* the benefits typically included in automotive class action settlements. [*Id.*]  
14 Specifically, as a review of automotive class action settlements demonstrates, such  
15 settlements typically only provide the class with an extended warranty and/or  
16 reimbursement for past repairs. [*Id.*] Such settlements are routinely approved as fair,  
17 adequate and reasonable. See, e.g., Sadowska v. Volkswagen Grp. of Am., Inc., No. CV  
18 11-00665-BRO AGRX, 2013 WL 9600948, at \*3 (C.D. Cal. Sept. 25, 2013) (describing  
19 an auto settlement that provided for a warranty extension and a reimbursement program  
20 as providing “substantial benefits to the Class”); Eisen v. Porsche Cars N. Am., Inc., 2014  
21 WL 439006, at \*4 (C.D. Cal. Jan. 30, 2014) (“It is unquestionable that the settlement  
22 provides substantial relief to all class members in the form of reimbursement for costs  
23 and expenses incurred due to the alleged IMS defect and extended warranty protection in  
24 the future.”). This Settlement includes both an extended warranty and reimbursement for  
25 past repairs, in addition to the free bypass wire repair procedure. This demonstrates the  
26 extraordinary nature of the relief provided to the Class under this Settlement.

27 • **The Time and Labor Required.** As discussed above, this case required a  
28 tremendous investment of time, effort and resources. [Frank Decl., ¶ 31.] For example,

1 MBUSA, on two separate occasions, convinced NHTSA to close an investigation into  
2 the alleged defect on the grounds a “safety defect trend” had not been identified. [Id.;  
3 Dkt. No. 109-4 at Exhs. C, D.] To prevent a similar outcome – which Class Counsel  
4 believed was wrong – Class Counsel did its own leg-work both prior to and after the  
5 filing of the lawsuit, such as developing a database of reported problems across the U.S.  
6 and purchasing seats from various Mercedes models for inspection by experts. [Frank  
7 Decl., ¶ 31.] After the filing of the lawsuit, part of MBUSA’s defense strategy was to  
8 make it as difficult as possible for Plaintiff to develop the factual record in this case. [Id.]  
9 For example, MBUSA claimed its parent company in Germany (Daimler AG) had the  
10 relevant engineering documents and other records related to the seat heaters, but that such  
11 records were not in its possession, custody or control since it is just a distributor of the  
12 vehicles. [Id.] On that basis, MBUSA successfully refused to produce such documents  
13 and successfully argued that Daimler AG is not subject to the jurisdiction of the U.S.  
14 courts and thus cannot be compelled to produce the documents. See Seifi v. Mercedes  
15 Benz USA, LLC, 2014 WL 7187111 (N.D. Cal. Dec. 16, 2014); Daimler AG v. Bauman,  
16 134 S.Ct. 746 (2014). Even as to documents in MBUSA’s possession, MBUSA generally  
17 resisted discovery until Class Counsel filed motions to compel or otherwise brought the  
18 matter to the attention of the Magistrate. [Id.] This “defend every field and do not give  
19 an inch” strategy by MBUSA substantially increased the time and labor required for Class  
20 Counsel in an already complex and time-consuming case. [Id.] Nevertheless, Class  
21 Counsel was able to overcome these obstacles for the benefit of the Class. [Id.]

22 • **The Novelty and Difficulty of the Issues Involved.** This case involved  
23 highly complex legal issues that are far from settled and are at the forefront of current  
24 federal and California jurisprudence. [Frank Decl., ¶ 32.] For example, this case  
25 involved such issues as (a) when does an automobile manufacturer have a duty to disclose  
26 a defect under California law; (b) what qualifies as a “safety risk”; (c) what is the duty to  
27 disclose to a down-stream purchaser; (d) does the class member need to be in privity with  
28 the defendant; (e) is a purchaser of a used vehicle too far removed from the chain of sale

1 to maintain fraud claims; (f) what do you need to show to establish knowledge of a defect;  
2 (g) what failure rate percentage is “material” in an automobile defect case; (h) how do  
3 you determine the market value of a component part in an automobile when there is no  
4 separate “market” for the component; (i) how do you determine the market value of a  
5 component part that is typically sold as part of a package; (j) is conjoint analysis an  
6 accepted method of damage analysis; (k) was the conjoint study properly conducted in  
7 this case; (l) does conjoint analysis improperly use averages to mask differences in  
8 consumer preferences that would otherwise create predominate individual issues; (m) can  
9 you obtain class certification in a case involving multiple models of vehicles with  
10 different failure rates; (n) can you maintain a class action when only some class members  
11 have experienced the malfunction; and the list goes on and on. [Id.]

12 • **The Skill Requisite to Perform the Legal Services Properly.** The legal  
13 and factual issues in this case required a high degree of skill and expertise to litigate.  
14 [Frank Decl., ¶ 33.] In class action litigation, there are many traps for the unwary that  
15 can result in losing class certification when not anticipated and dealt with up front. [Id.]  
16 But here, because of Class Counsel’s background defending Fortune 500 companies in  
17 consumer fraud class actions, Class Counsel was well aware of the defenses and  
18 arguments MBUSA’s counsel would employ to argue against class certification. [Id.]  
19 Class Counsel also had extensive experience litigating the complicated and highly  
20 technical engineering issues involved in this matter. [Yuhl Decl., ¶ 4; McNicholas Decl.,  
21 ¶ 4.] By anticipating and addressing these arguments at the beginning of the case, Class  
22 Counsel was able to develop a factual record that maximized the chances of winning on  
23 class certification and on the merits at trial, which resulted in the Settlement of this  
24 lawsuit. [Frank Decl., ¶ 33.]

25 • **The Preclusion of Other Employment by Class Counsel Due to**  
26 **Acceptance of this Case.** The Class Counsel in this case are three relatively small firms.  
27 [Frank Decl., ¶ 34; Yuhl Decl., ¶ 6; McNicholas Decl., ¶ 6.] They can only handle so  
28 many complex class actions like this one, especially given that they are investing so much

1 time and money in the case. [Id.] By necessity, Class Counsel is required to be highly  
2 selective when choosing whether to invest in a case, because cases like this take years to  
3 resolve before they see any potential return. [Id.]

4 • **Whether the Fee Is Fixed or Contingent.** This case was taken on a full  
5 contingency. [Frank Decl., ¶35; Yuhl Decl., ¶ 12(a); McNicholas Decl., ¶ 11(a).] Unlike  
6 defense counsel who were being paid by the hour, Class Counsel worked without  
7 compensation for years with the chance they would never get paid. [Id.] Class Counsel  
8 also paid nearly \$650,000 in costs, knowing full well that, if they lost, these costs would  
9 be unrecoverable. [Id.]

10 • **The Amount Involved and Results Obtained.** As established above, the  
11 Settlement provides an exceptional result for the Class and over \$85 Million in benefits.  
12 [Pinsonneault Decl., ¶ 13.]

13 • **The “Undesirability” of the Case and Risks Inherent in Litigation.** This  
14 was a difficult case for Class Counsel to take on, with a far from certain outcome. [Frank  
15 Decl., ¶ 37.] The fact that NHTSA closed two investigations about this problem without  
16 further action always made this case a risky gamble. [Id.] But through Class Counsel’s  
17 hard work and dedication, this gamble paid off for the Class. [Id.]

18 Accordingly, Class Counsel’s fee request is more than justified under the  
19 percentage of the benefit method.

## 20 **2. The Fee Request Justified Under the Lodestar Method.**

21 Under the lodestar method, Class Counsel’s fee request is likewise fair and  
22 reasonable. Class Counsel’s current lodestar is \$3,431,570.30. [Frank Decl., ¶ 39(d).]  
23 Thus, Class Counsel’s fee request currently includes a lodestar multiplier of 1.65.<sup>4</sup> That  
24 multiplier is more than justified in this case, and falls within the range approved by courts

25 \_\_\_\_\_  
26 <sup>4</sup> By the time of final approval, that multiplier will be lower, as Class Counsel anticipates  
27 spending additional time between now and final approval working with the class  
28 administrator, communicating with class members, reviewing and responding to any  
objections, and preparing the motion for final approval, and preparing for and attending  
the final approval hearing.

1 in this circuit. In re Volkswagen “Clean Diesel” Mktg., Sales Practices, & Prod. Liab.  
2 Litig., 2017 WL 3175924, at \*4 (N.D. Cal. July 21, 2017) (approving lodestar multiplier  
3 of 2.02 as “more than reasonable given the complexities of this case, the skill and  
4 diligence of Class Counsel, and the extraordinary results achieved for the Class”); In re:  
5 Toyota Motor Corp Unintended Acceleration Litigation, Order re: Fees (Dkt. No. 3802)  
6 at pg. 5 (approving as reasonable a multiplier of 2.87, noting it was “within the range  
7 approved by courts within this Circuit”).

8 For example, a recent Central District court decision cited with approval a holding  
9 that a multiplier of 2.43 is “*per se* reasonable” in a nationwide class action settlement.  
10 See Schulein v. Petroleum Dev. Corp., 2015 WL 12762256, at \*1 (C.D. Cal. Mar. 16,  
11 2015) (citing Been v. O.K. Industries, Inc., 2011 WL 4478766, at \*11 (E.D. Okla. 2011)  
12 (citing a study reporting the average multiplier in 1,120 class actions cases and find that  
13 a 2.43 multiplier would be “*per se* reasonable”).

14 **a. Ninth Circuit Law Requires a Risk Multiplier in this Case.**

15 Under Ninth Circuit precedent, “[t]he district court must apply a risk multiplier to  
16 the lodestar when (1) attorneys take a case with the expectation they will receive a risk  
17 enhancement if they prevail, (2) their hourly rate does not reflect that risk, and (3) there  
18 is evidence the case was risky.” Stetson v. Grissom, 821 F.3d 1157, 1166 (9th Cir. 2016);  
19 Stranger v. China Elec. Motor, Inc., 812 F.3d 734, 741 (9th Cir. 2016) (same); Fischel v.  
20 Equitable Life Assurance Soc’y, 307 F.3d 997, 1008 (9th Cir. 2002) (same). “Failure to  
21 apply a risk multiplier in cases that meet these criteria is an abuse of discretion.” Id.  
22 Here, each of these factors are met.

23 • *First*, Class Counsel took this case on a full contingency, and in doing so  
24 expected a risk enhancement if they prevailed. [Frank Decl., ¶ 39(e)(i); Yuhl Decl., ¶  
25 12(a); McNicholas Decl., ¶ 11(a).] “It is an established practice in the private legal  
26 market to reward attorneys for taking the risk of non-payment by paying them a premium  
27 over their normal hourly rates for winning contingency cases.” Fischel, 307 F.3d at 1008.  
28

1 “A contingent fee must be higher than a fee for the same services paid as they are  
2 performed. The contingent fee compensates the lawyer not only for the legal services he  
3 renders but for the loan of those services.” Graham v. Daimler Chrysler Corp., 34 Cal.  
4 4th 553, 580 (2004).

5 • *Second*, Class Counsel’s hourly rates are commensurate with market rates  
6 for hourly defense counsel of their experience and do not reflect the risk associated with  
7 this being a contingency case. [Frank Decl., ¶ 39(e)(ii)-(iii); Declaration of Eric F. Yuhl  
8 (“Yuhl Decl.”), ¶ 12(b)-(c); Declaration of Patrick M. McNicholas (“McNicholas Decl.”),  
9 ¶ 11(b)-(c).]

10 • *Third*, this case was very risky for Class Counsel. As noted above, when  
11 Class Counsel took this case NHTSA had already closed two preliminary investigations  
12 into the alleged defect. Moreover, Class Counsel committed themselves to fronting all  
13 the expenses in this case through trial and appeal. [Frank Decl., ¶¶ 35, 39(e)(iv); Yuhl  
14 Decl., ¶ 12(d); McNicholas Decl., ¶ 11(d).] Based on Class Counsel’s experience, Class  
15 Counsel knew such expenses could easily exceed \$500,000, and that reality was borne  
16 out as the case was litigated. [*Id.*] Class Counsel also knew that if they did not prevail,  
17 those expenses would be non-recoverable. [*Id.*] Those factors alone demonstrate the  
18 very risky nature of this case.

19 **b. The Requested Risk Multiplier Is Justified and Reasonable.**

20 The requested multiplier is justified under the Kerr “reasonableness” factors. See  
21 Kerr v. Screen Extras Guild, Inc., 526 F.2d 67, 70 (9th Cir. 1975). Under Kerr and its  
22 progeny there are “a host of ‘reasonableness’ factors, including the quality of  
23 representation, the benefit obtained for the class, the complexity and novelty of the issues  
24 presented, and the risk of nonpayment.” Stetson, 821 F.3d at 1166 (quoting In re  
25 Bluetooth Headset Prod. Liab. Litig., 654 F.3d 935, 941-942 (9th Cir. 2011)). An analysis  
26 of the Kerr factors demonstrates the appropriateness of a 1.65 multiplier:

27 • Class Counsel could not have been reasonably expected to obtain a better  
28 result for the Class. This is of great importance, as “[f]oremost among [the Kerr factors]

1 is the benefit obtained for the class.” In re Bluetooth, 654 F.3d at 942. Indeed, the  
2 excellent result obtained by Class Counsel, standing alone, is sufficient to justify the  
3 requested multiplier.

4 • The quality of representation provided by Class Counsel was excellent.  
5 Class Counsel are experienced class action litigators and obtained a superb result for the  
6 Class despite facing off against a well-financed, litigation savvy defendant represented  
7 by top-tier defense counsel with a particular expertise in auto defect class actions.

8 • The complexity and novelty of the issues presented was substantial, as  
9 discussed above.

10 • The multiplier is in line with other similar cases. In re Volkswagen, 2017  
11 WL 3175924, at \*4 (approving lodestar multiplier of 2.02; In re: Toyota, Order re: Fees  
12 (Dkt. No. 3802) at pg. 5 (approving as reasonable a multiplier of 2.87); Schulein, 2015  
13 WL 12762256, at \*1 (citing case approving lodestars in 2 to 3 range as per se reasonable).

14 • Finally, a fee award will not in any way reduce the amount of money  
15 available to the Class.

16 In sum, Class Counsel’s fee request is reasonable under the lodestar method.

17 **B. Class Counsel’s Request for Reimbursement of Expenses Is Reasonable**  
18 **and Appropriate**

19 “Class Counsel are entitled to reimbursement for out-of-pocket expenses that  
20 would normally be charged to a fee-paying client.” Katz v. China Century Dragon Media,  
21 Inc., 2013 WL 11237202, at \*8 (C.D. Cal. Oct. 10, 2013); see also Fed. R. Civ. P. 23(h).  
22 Here, Class Counsel incurred \$648,644.41 in case related costs that would normally be  
23 charged to a fee-paying client. [Frank Decl., ¶ 39(b).] Pursuant to the Settlement,  
24 however, Class Counsel has agreed to limit its reimbursement request to \$584,085.20,  
25 which represent more than a 15% discount relative to the actual costs incurred. That  
26 makes Class Counsel’s cost reimbursement request all the more fair and reasonable.

1           **C. Plaintiff’s Incentive Award Request Is Fair, Reasonable, and**  
2           **Appropriate.**

3           “Incentive awards are fairly typical in class action cases.” Rodriguez v. W. Publ’g  
4           Corp., 563 F.3d 948, 958 (9th Cir. 2009). Further, numerous courts in the Ninth Circuit  
5           has demonstrated a strong commitment to the case. See Garner v. State Farm Mut. Auto.  
6           Ins. Co., 2010 WL 1687832, at \*17, n. 8 (N.D. Cal. Apr. 22, 2010) (collecting cases where  
7           dedicated class representative received incentive award of \$20,000 or more).

8           When considering requests for incentive awards, courts may consider five factors:  
9           (1) the risk to the class representative in commencing suit, both financial and otherwise;  
10          (2) the notoriety and personal difficulties encountered by the class representative; (3) the  
11          amount of time and effort spent by the class representative; 4) the duration of the  
12          litigation; and (5) the personal benefit (or lack thereof) enjoyed by the class representative  
13          as a result of the litigation. Van Vranken v. Atl. Richfield Co., 901 F. Supp. 294, 299  
14          (N.D. Cal. 1995). These factors favor Plaintiff’s incentive award request.

15          *First*, Plaintiff is employed full-time. [Callaway Decl., ¶ 2.] While he did not  
16          undertake any direct financial risk, his decision to commence suit brought with it the  
17          inevitable risk and distractions resulting from holding full-time employment and also  
18          being involved in class action litigation. [Id.] Thus, the first factor favors an incentive  
19          award.

20          *Second*, Plaintiff encountered substantial difficulties by serving as the class  
21          representative. Plaintiff provided his Subject Vehicle to the experts for inspection, which,  
22          pursuant to an agreement of the parties, was disassembled and placed in storage for over  
23          two years. [Callaway Decl., ¶ 3.] In other words, Plaintiff sacrificed his vehicle for over  
24          two years for the benefit of the Class. [Id.] Plaintiff’s participation also led to him being  
25          sued by his former counsel (Eagan Avenatti, LLP) and thus having to be involved as a  
26          defendant in a separate lawsuit. [Id.] Thus, the second factor strongly favors an incentive  
27          award.

1           *Third*, Plaintiff consistently communicated with his counsel about the status of the  
2 litigation, both in person, by phone and by email. [Callaway Decl., ¶ 4.] Plaintiff further  
3 actively participated in discovery. [*Id.*] Plaintiff was deposed and was involved in  
4 responding to written discovery and gathering responsive documents. [*Id.*] Plaintiff  
5 estimates he spent seventy-five (75) hours performing his duties as a class representative  
6 in this case. [*Id.*] Thus, the third factor favors an incentive award.

7           *Fourth*, this litigation is nearly three years old. This factor likewise supports an  
8 incentive award. See Fleury v. Richemont North America, Inc., 2008 WL 3287154 (N.D.  
9 Cla. Aug. 6, 2008) (citing three-year litigation as one reason for incentive award).

10           *Fifth*, Plaintiff is receiving no personal benefit from this lawsuit that is not enjoyed  
11 by the rest of the Class. [Callaway Decl., ¶ 5.]

12 **V. CONCLUSION**

13           Based on the foregoing, Plaintiff requests this motion be granted.
